Course Description
This course explores the role of psychological factors in the experience of health and illness. We will examine research evidence and the need for a biopsychosocial model in order to understand and clinically treat various health problems (e.g., obesity, stress, pain, heart disease, cancer).

*Please note that this is a “blended” course, which means that some of the course is taught online. See course schedule below for further details.

Time and Location
Fridays, 11:30-2:30 in Curtis Lecture Hall A

Required Reading

Prerequisite
AK/AS/HH/SC/PSYC 1010 6.0 with a minimum grade of C.

Tips for Doing Well in this Course

1. Start using the online resources right away.
2. Come to class and pay attention. Access online lecture slides to help with note taking.
3. Buddy up with someone in class with whom you can share notes in case you can’t come to class. I do not give out my detailed lecture notes and the slides don’t cover everything.
4. Come see either me or the TA before/after class or during office hours if you have any questions about the material or the tests.
5. Keep up with the readings. The textbook material is dense.

Policy on Missed Tests or Exams

1. Within 48 hours of the missed test or exam, students must contact the instructor by phone or email. Be sure to clearly state your name, student number, course, reason for missing the exam, and a phone number or email address.
2. Appropriate documentation verifying the circumstances for the missed test or exam must be provided within one week of the missed exam. Failure to provide appropriate documentation will result in a grade of 0.
   A. Tests or exams missed for medical reasons must be supported by an **Attending Physician’s Statement**. The Attending Physician's Statement must include (I) the full name, mailing address and telephone number of the Physician, (ii) state the nature of the illness and its duration and (iii) a statement that the illness and/or treatment would have SERIOUSLY affected the student’s ability to study and perform over the period in question, not just that they were ill and were seen by a doctor. If the note is not detailed enough, it will not be accepted.
   B. Tests or exams missed for non-medical reasons must be supported by appropriate documentation (i.e., copy of a death certificate, automobile accident report, etc.) Pre-booked travel is not an acceptable excuse for missing a test or exam.
3. In the case of a missed test, a prorated grading procedure will be used: the grade component will be distributed across the other tests or exams in the course. The other evaluative components will still have the same weighting relative to each other (i.e., 43% and 57% for the other test and the final exam, respectively). If the final exam is missed, the student must formally petition for deferred standing in the course with the Registrar’s office.
