COURSE DETAILS

**Instructor**
Dr. W. Dale Stevens
Email: stevensd@yorku.ca

**Office Hours**
By Appointment
Sherman Health Science Research Centre, Room 2036 (or BSB 244)
Office phone: 416.736.2100 x44662 [BUT PLEASE USE EMAIL]

**Reading Materials**
No textbook is required for this course. Instead, selected articles from the relevant literature will be assigned for reading each week for the various topics. (See **Schedule of Readings** below.)

**Course Description:**
This course will survey a variety of topics in the area of human memory and its relationship with other cognitive processes, such as perception, conceptual processes, and executive function, primarily from a cognitive neuroscience perspective. Current theories and research on memory will be presented and discussed, focusing on the processes and systems involved at encoding, storage, and retrieval, as well as the errors of memory and the importance of memory in our everyday lives. Evidence derived from work with clinical populations with memory disturbances, healthy older individuals, research involving the use of animal models, and brain-imaging techniques to study the neural basis of memory and cognition will be explored.

Students will be required to read and critically evaluate selected articles from the literature and engage in active discussion during classes, with a particular focus on ongoing debates in the field regarding a number of topics.

At the end of this course, students should be able to identify current key debates in the field, understand and critically evaluate primary source research papers, including empirical studies and reviews, and effectively communicate their knowledge in both written and oral forms.

*Prerequisites: Students should be familiar with basic principles of brain structure and function to fully appreciated the readings and material that will be presented. Official course pre-requisites include: AK/AS/SC/PSYC 1010 6.00 or AK/PSYC 2410 6.00, with a minimum grade of C; AK/AS/SC/PSYC 2030 3.00 or AK/PSYC 2530 3.00; one of AK/AS/SC/PSYC 2021PSYC 3.00, AK/AS/SC/PSYC 2020 6.00, AK/PSYC 2510 3.00; one of AK/PSYC 3130 3.00, AK/PSYC 3135 3.00, AK/PSYC 3260 3.00 (after Winter 2002), AS/SC/PSYC 3260 3.00, AK/AS/SC/PSYC 3265 3.00.*

**Evaluation:**

(See detailed description of each component below under **Course Evaluation**)

* Late thought papers will **not** be accepted. See policy for missed classes, presentations, and deadlines below.

**Note:** The last day to drop the course without receiving a grade on your transcript is June 16, 2015.
# ACADEMIC POLICIES

## Missed Classes, Presentations, and Deadlines

1. Students must email the instructor in advance of any missed class/presentation/deadline if at all possible; otherwise, within 24 hours following the missed class/presentation/deadline.

2. Appropriate documentation (See A, B below) verifying the circumstances for the missed class/presentation/deadline must be provided within one week (7 calendar days). Failure to provide appropriate documentation will result in: a grade of 0 for participation in a given class, thought papers, and presentations; a penalty of 10% per day for late Term Paper Outlines and Term Papers.

### A.

Classes, presentations, and deadlines for thought papers and term papers/outlines missed for medical reasons must be supported by an Attending Physician’s Statement, which can be downloaded at the following link: [http://www.registrar.yorku.ca/pdf/attend_physician_statement.pdf](http://www.registrar.yorku.ca/pdf/attend_physician_statement.pdf)

The Attending Physician’s Statement must:

(i) Include the full name, mailing address and telephone number of the physician

(ii) State the nature of the illness and its duration

(iii) Include a statement that the illness and/or treatment would have SERIOUSLY affected the student’s ability to study or perform over the period in question, not just that they were ill and were seen by a doctor. Notes without such wording will not be accepted.

NOTE: The instructor and/or Psychology Undergraduate Office will follow-up on medical notes. Falsification of any documentation relating to an absence or missed deadline is a serious academic offence (see “Academic Policies” below).

### B.

Classes, presentations, and deadlines missed for legitimate non-medical reasons must be supported by appropriate documentation (i.e., copy of a death certificate, automobile accident report, etc.) Pre-booked travel is not a legitimate excuse.

## Academic Policies

Students must familiarize themselves with the Senate Committee on Curriculum & Academic Standards webpage: [http://www.yorku.ca/academicintegrity/students/index.htm](http://www.yorku.ca/academicintegrity/students/index.htm)

Please also complete the tutorial on academic integrity. All students must complete the quiz and submit a copy of the results before any written work may be submitted: [http://www.yorku.ca/tutorial/academic_integrity/](http://www.yorku.ca/tutorial/academic_integrity/)

## Policy Regarding E-mail

All email correspondence to Dr. Stevens must include the course code (PSYC 4270) in the subject-header to prevent messages from being filtered as spam, and close with your full name and student number (e.g., “Jennifer Jones, 867530986”). A response from Dr. Stevens can be expected within 48 hours, not including weekends. Please re-send your message if you do not receive a reply within this timeframe. **Before contacting Dr. Stevens, reread the syllabus carefully first to determine if it answers your question.**
Resources
A number of valuable resources are available to students at York University. Importantly, this includes the Writing Center. Please visit the website: http://www.yorku.ca/laps/writ/centre/

York University also offers both academic and crisis counseling services. For information, visit the Counseling and Development Centre website: http://www.yorku.ca/cts/

Please inform the instructor as soon as possible if there are extenuating circumstances that may interfere with the successful completion of the course requirements in order to make appropriate arrangements.

Course Evaluation:

Class Participation:
A large proportion of each class will be devoted to class discussion. Therefore, an evaluation of each student’s participation makes up a considerable proportion of the overall grade for the course. Participation in the seminars includes showing up on time and prepared for every class, having read the assigned readings, and engaging in discussion. Students will be expected to discuss their opinions, thoughts, and views, as well as those expressed by their fellow students.

Thought Papers:
Students are required to submit up to 5 “thought papers” on the readings at the beginning of class (excluding the first and tenth classes). The purpose of the thought paper is to present your view of the readings in at least one of the following ways: describe the interesting or main questions and how well you believe they were addressed by one or more of the papers; evaluate the experimental design and/or the authors’ interpretation of the findings; discuss ideas for theory or experiments that the paper(s) inspired; describe how the papers complemented or contradicted each other. The thought paper must demonstrate that the student has read and critically evaluated one or more of the readings. Importantly, the thought paper is NOT meant to merely summarize the readings, but rather, to serve as a stimulus for class discussion. Finally, you may not submit a thought paper on the same topic as your presentation or term paper.

Thought papers should be 1 (minimum) to 2 (maximum) pages long (double-spaced, 12-point font, 1-inch margins all around), not including the title page and references (at least 1 reference must be included). 4 thought papers are required, but you may submit up to 5 (only 1 per class), and the best 4 will be counted towards your final grade. Thought papers are due at the beginning of each class in which the relevant paper(s) was/were assigned, and will not be accepted late.

Presentation:
Each student will serve as a discussion leader and be responsible for presenting a seminar on one of the assigned topics. This will involve extracting the important issues of one or more of the readings, posing discussion questions for the class, and leading/moderating the discussion. There will typically be 2 student presentations per class, so presenting students must coordinate with one another to ensure that their presentations are complementary and not overlapping or redundant.

To lead the discussion, it will be necessary to elaborate on the background and introduction of the paper(s) to provide the theoretical context in which the main questions were asked. To do this well, you may need to read an additional article or two in order to be fully prepared to discuss the assigned paper. If you choose an empirical article, it will also be necessary to provide a concise description of the methods, the main findings, and interpretation of the findings. You should also share your perspective on, and evaluation of, the paper(s), and prepare several questions to discuss with the rest of the class. The questions can be points of confusion, issues for further consideration, follow-up research ideas, and so on. The presentation should take approximately 30 minutes, with another 10-20 minutes for class discussion.

Additionally, three students will evaluate each presentation and provide feedback via email to the instructor (who will forward the anonymized feedback, along with his own, to the presenter) within the following week. The reason for this is to provide valuable feedback to the presenter so that they can learn from the experience and improve their communication and oral presentation skills. Student evaluations will contribute to the participation grade for the evaluators.

Term Paper & Outline:
For your term paper, you may write a comprehensive review, or a research proposal, related to any of the topics covered throughout the course (must be different from your presentation topic). If you choose to write a review paper, it must have a clear thesis and present a novel argument or synthesis of the ideas presented and/or discussed in the course (e.g., you may choose to compare, contrast, and evaluate two competing theories). If you choose to write a research proposal, it must include an introduction providing the context and rationale for the study, and a methods section (participants, materials, procedures, proposed analyses, and hypothesized results). Your paper must be a maximum of 8 pages (double-spaced, 12-point font, 1-inch margins all around) not including the title page, abstract (if included), or references. The paper must be written in APA format (see Publication Manual of the American Psychological Association, 5th Edition, Washington, DC: American Psychological Association). There will be a penalty for late submissions of 10% per day.

Approximately halfway through the term (see Course Schedule), you must submit a 2-page outline that indicates whether you will write a review or a research proposal, and clearly delineates the structure of your paper. The structure and requirements of your outline will be discussed during class.
Schedule of Readings:

Some of the readings will be mandatory, as indicated by the asterisk (*) beside the reference; others will be optional/supplemental. The reading list will be modified throughout the term, and additional readings will be added on occasion. See course Moodle site for most up-to-date list of readings for each week.

May 19  Course Overview

No Readings

May 21  Approaches & Methods in Memory & Cognition Research

May 26  Object Concepts & Semantic Memory

May 28  Neurocognitive Specialization & Plasticity

June 2  Implicit Memory

June 4  Priming & Repetition Suppression

**June 9**

**Cognitive Neuroscience Lab Tour** (Meet at Sherman Health Science Research Centre)

**June 11**

**Encoding & Perception**

**June 16**

**Retrieval & Distortions**

**June 18**  
**Time & Space: Prospection & Spatial Cognition**

**June 23**  
**Executive Function & Working Memory**

**June 25**  
**Neurocognitive Aging**
