The URPP coordinator will visit our class in the first few weeks of the course to describe the URPP program and your participation in it. All Introductory psychology students can receive 4% for participating in 6 hours of research run by the URPP. The 4% is added on to your exam grades to give you a final grade out of 100%. You can contact them at urpp@yorku.ca. If you have any concerns regarding URPP points or participation, email them, not your instructor or TA.

URPP or Research Participation: Will be discussed at first class. This will be 4% of the course grade.

Program Learning Outcomes
Upon completion of this course, students should be able to:
1. Define psychology and explain how it meets the criteria of science.
2. Recognize key concepts, methods, theories and assumptions in psychology.
3. Describe basic characteristics of the scientific method in psychology.
4. Discern differences between personal views and scientific evidence.

COURSE FORMAT
This course will be conducted in a lecture format with films and occasional in class demonstrations. The lectures will discuss and expand upon text readings. The first lectures will follow the text fairly closely but as the course progresses the lectures will deviate from the text. Although not all text material will be discussed directly in class you are responsible for the material for test purposes. Some of the lectures will discuss material not available in the text. Again, you are responsible for this material as well as films shown in class. If you miss a class, try to borrow notes from a classmate.

When studying for tests, do not study just from the text or just from the lecture notes. Films and videos will be shown from time to time and general questions derived from this material may appear on tests. Periodically, research demonstrations and experiments will be conducted in class. These are generally designed to illustrate important concepts or to give experience in participating in a subject role in research. Although direct participation is voluntary, it is encouraged and the results of any such exercise will be discussed in class where relevant and questions based on this material may appear on tests. If in doubt as to the material to be examined on tests, please ask the TA or Dr. Goldberg.

Updated contact information, room location(s) and office hours of the Teaching Assistant(s) will be posted on the Moodle website. If there is more than one TA for the course, students will be assigned to a specific Teaching Assistant alphabetically by the student’s last name. Check the website about two weeks into the course to find out who is your assigned TA. When a course enrolment is large, it’s important that each student have someone who is familiar with him or her and their grades etc. If you have trouble meeting during your TA office hours because conflict, simply contact them about this. If there are other TAs for this course, they will arrange to transfer you to another TA whose hours you can make.

Each of the TA’s will be available each week for consultation regarding text readings, exams, grades, study habits, etc. If you are having trouble with the course, visit the TA’s. The TA’s also will be happy to talk with you about improving your study habits and about graduate school in psychology and careers in psychology.

Reviewing Tests with your TA

Students are encouraged to review their tests with their TA (see chart). Once graded, the TAs will be available during office hours to review these with you. The TAs will keep the written tests in order that students may examine their tests and receive feedback regarding how students are doing and how to do better. Tests may not be removed from the office nor copies made.

START YOUR OWN STUDY TEAM

It has been said that students learn most from communicating with each other. When students get together to help each other understand material they relate to and remember the material. I encourage you to form your own study teams. The course website or Moodle site is set up so that students may communicate among themselves using the class discussion forum link. This forum provides a means of communicating with your classmates in between classes. All of you have the opportunity to invite others to join them at a specified time and place to form teams. For example you might select one of the following as a meeting time: immediately after class, one hour before
class, Monday to Friday during the day, Monday to Friday during the evening, Weekend, etc. You would also suggest some meeting location. The specific location might be a reserved room in the library. Here is the URL for booking rooms in the library (http://www.library.yorku.ca/cms/learning-commons/study-rooms/). If you are unable to do this, consider other locations in the library, various gathering places such as within the Student Centre or other safe and comfortable places on or off campus. While meeting on campus seems to be more effective, you might find that what works better for you is meeting people in a coffee shop, library, community centre. Make sure it is a safe location. Get started right away. Take a leadership role and send out an email invite to your fellow students.

For any missed tests or late assignments, students MUST
